Border Residents Remain Skeptical About The Need For An Expanded Wall.

American Accent

AUDIE CORNISH: Some form of a **border wall** has existed for years in urban areas along the southern **border**. In some neighborhoods, the **wall** has helped reduce foot traffic and crime. Elsewhere, it's made a less tangible impact. And not everyone is convinced that the **wall** has made them safer. Monica Ortiz Uribe reports.

MONICA ORTIZ URIBE: At Ardovino's Desert Crossing, an Italian restaurant in southern New **Mexico**, it's not unusual for diners to look up from their gnocchi and see **Border** Patrol outside, aiming flashlights at the ground.

Abstract (summary)

The US educational and correctional systems are quintessential representations of the social welfare state and the penal state, respectively, and are typically configured as opposites. In the war on crime era, however, public schools collaborated with the criminal justice system to become more punitive. The institutions began to share leadership and funding, and developed policies, technologies, cultural practices, and a disciplinary rhetoric in common. In this article, the author explores the structural forces shaping the correctional approach in education. She draws on theories in the sociology of punishment to examine racialized youth punishment as a sociopolitical and economic strategy. This inquiry enables an assessment of the extent to which the sociopolitical economies of the penal state erode the social welfare principles of public schooling. She also ask how the expansion of penality in public schools addresses larger demands for economic growth and offers new strategies for managing populations abandoned at the urban industrial core.

The US educational and correctional systems are quintessential representations of the social welfare state and the penal state, respectively, and are typically configured as opposites. In the war on crime era, however, public schools collaborated with the criminal justice system to become more punitive. The institutions began to share leadership and funding, and developed policies, technologies, cultural practices, and a disciplinary rhetoric in common. Critical attention to the punitive in public education has yielded new and situated analyse^a of the minority achievement gap (Losen and Gillespie 2012). Racialized school failure has been exacerbated by increasingly severe school disciplinary climates, in which minority males have been disproportionately punished and consequently excluded from educational tracks (Losen and Martinez 2013). The racial disparities in school discipline are so extreme and the consequences so harsh, in fact, that recent scholarship in education presents the phenomenon as a major civil rights issue (ibid.).
