## Records Retention Schedule

Prepared by the State Records Branch  
Archives and Records Management Division  
Approved by the State Libraries, Archives, and Records Commission

Kentucky Department for Libraries and Archives

This records retention schedule governs retention and disposal of records created, used, and maintained by this agency. **Government records in Kentucky can only be disposed of with the approval of the State Libraries, Archives, and Records Commission (the Commission). If records do not appear on a Commission-approved records retention schedule, agencies should not destroy those records.** This agency-specific schedule was drafted by agency personnel and Archives and Records Management Division staff and reviewed and approved by the Commission. This schedule provides the legal authority for this agency to destroy the records listed, after the appropriate retention periods have passed.

Agency personnel should use this agency-specific schedule in combination with the *General Schedule for State Agencies (General Schedule)*, also approved by the Commission. The *General Schedule* applies to records that are created, used, and maintained by staff at all or most state agencies. Agency-specific retention schedules are used only by specific agencies and apply to records that are created only by a particular state agency, or to records that a state agency is required to retain longer than the approved time period on the *General Schedule*. The *General Schedule* and agency-specific retention schedule should cover all records for this agency.

This retention schedule applies to state agency records and information regardless of how it is created or stored. For example, information created and sent using e-mail is as much a public record as materials created or maintained in paper. Kentucky law defines public records, in part, as "documentary materials, *regardless of physical form or characteristics*, which are prepared, owned, used, in the possession of or retained by a public agency" (KRS 171.410[1]). This means that records management standards and principles apply to all forms of recorded information, from creation to final disposition, regardless of the medium. Records retention scheduling is important in developing, using, and managing computer systems and other electronic devices. Records management practices encourage cost-effective use of electronic media through accurate retention scheduling and legal destruction of records.

**All state government employees are responsible for maintaining records according to the retention schedule, whether those records are stored electronically or in paper. Information must be accessible to the appropriate parties until all legal, fiscal, and administrative retention periods are met, regardless of the records storage medium.**

### **Audits and Legal Action**

Agency records may be subject to fiscal, compliance or procedural audit. If an agency should maintain records longer than the approved retention period, as may be the case with some federal audits, then all affected records should be retained until the audit has been completed and the retention period met. In no case should records that are subject to audit be destroyed until the audit has been completed and retention periods met, or the records have been officially exempt from any audit requirements.

Records may also be involved in legal or investigative actions, such as lawsuits, administrative hearings, or open records matters. These records must be retained at least until all legal or investigative matters have concluded, regardless of retention period. This includes all appeals of lawsuits.

### **Vital Records**

Vital records are essential to the continued functioning of an agency during and after an emergency. Vital records are also essential to the protection of the rights and interests of an

agency and of the individuals for whose rights and interests it has a responsibility. Vital records are identified in the retention schedule with a (V).

### **Confidential Records**

While all records created, used, and maintained by government agency personnel are public records, not all of those records are open to public inspection. Whether a record is open to public inspection is determined by the state's Open Records laws and other relevant state or federal statutes and regulations. Restriction of public inspection of confidential records may apply to the whole record or only to certain information contained in the record.

Kentucky's public records are considered open for public inspection unless there is some specific law or regulation that exempts them. Agency personnel who believe certain records are confidential should submit a citation from Kentucky Revised Statutes, Administrative Regulations, Code of Federal Regulations, or similar authority. **State agency heads have the responsibility to know all the appropriate confidentiality laws, statutes and regulations that apply to the records maintained by their agency and to see that those laws are enforced.** Even though a record series may or may not be marked confidential on a retention schedule, contradictory laws or regulations that are passed after the schedule has been approved must be honored.

### **Copies of Records**

Agency personnel often make copies of records for internal use or reference purposes. Agencies should designate one copy as the official copy and make sure it is retained according to the records retention schedule. Agencies can destroy all other copies when no longer useful.

### **Updating the Retention Schedule**

Per 725 KAR 1:010, the head of each state government agency is required to designate a member of his or her staff to serve as a records officer. The agency records officer represents that agency in its records-related work with the Archives and Records Management Division. The agency records officer is responsible for assisting the Archives and Records Management Division in drafting a records retention schedule, and in finding any schedule updates to bring before the Commission. The retention schedule should be reviewed on a regular basis to suggest appropriate changes to the Commission.

## **Department of Agriculture**

The Department of Agriculture was created to promote the interests of agriculture and horticulture in the Commonwealth of Kentucky and is governed by Kentucky Revised Statutes 246 – 263.

The first agricultural government unit in Kentucky was established in 1817 in Fayette County and has evolved through the years. The Department of Agriculture was established in 1942 as part of Agriculture, Labor and Statistics. In 1962, the Department of Agriculture was created as its own entity and is under the direction of an elected Commissioner.

The Department of Agriculture consists of the Office of the Commissioner, Office of the Chief Executive Officer, Office for Agricultural Marketing and Product Promotion, Office for Consumer and Environmental Protection, Office of State Veterinarian, Office for Strategic Planning and Administration, State Board of Agriculture, and the Board of Veterinary Examiners.

01901	<b>Herd Health Files (excluding horses) (V)</b>	<p>This series documents the testing and movement of animals, other than horses, into and out of a herd within the state. As required in KRS Chapter 257, each farm must have animals tested for diseases before buying, selling, importing, exporting, or moving them across the state. The tests are sent to the Division, and a folder is established on each herd. Once a file is created, herds can be followed until all of the animals have been slaughtered. If an animal has tested positive for any disease, the entire herd is quarantined until treated. The series enables the Division to trace herds suspected of carrying diseases so that treatment can be continued, as required by procedures. The series also provides information on animals purchased from other states, as well as herds moving within the state. Information from the series is of value to the U.S. Department of Agriculture and Animal and Plant Health Inspection, in cooperation with the Department of Agriculture.</p> <p><b>Access Restrictions</b> KRS 61.878(1)(a) - personal information. Agencies should consult legal counsel regarding open records matters.</p> <p><b>Contents</b> Series may contain: Brucellosis test record, vaccine certification, in-state and out-of-state health certificates, tuberculosis test record, suspect record, order of quarantine, appraisal and indemnity claim, field investigation of brucellosis market test reactors, official quarantine release, related correspondence, yearly test report, pseudo-rabies surveillance card request, import swine herd file.</p> <p><b>Retention and Disposition</b> Retain in agency. Destroy non-infected herd records after ten (10) years. Destroy infected herd records after fifteen (15) years.</p>
03712	<b>Swine Herd Owner File</b>	<p>This series documents all activities of swine herd owners within the state, including information on the movement, selling and testing of swine herds throughout the State. All swine must be tested and treated to control infectious swine diseases. These tests are done by a licensed veterinarian and sent to a state/federal lab for processing. The tests and the results are then sent to the Division of Animal Health. The records are used in tracking swine herds to prevent the spread of diseases.</p> <p><b>Access Restrictions</b> KRS 61.878(1)(a) - personal information. Agencies should consult legal counsel regarding open records matters.</p> <p><b>Contents</b> Series may contain: Initial Qualification and Maintenance of Qualified Pseudo rabies (Negative Swine Herds), Initial Validation and Maintenance of Validated Brucellosis, Brucellosis Test Record, Correspondence, Official Quarantine Release, Quarantine for Retest, Pseudo rabies Test Record, Tuberculosis Test Record, Certificate of Veterinary Examination.</p> <p><b>Retention and Disposition</b> Retain in agency. 03719	<b>Contagious Equine Metritis Culture - Accession Sheet</b>	This series documents the treatment each horse imported into Kentucky is required to have in addition to the Contagious Equine Metritis (CEM) CF (complement fixation) test. The accession sheet documents the results of culture sites and comes from the testing laboratory, along with the CEM CF test. Any horse imported into the State from another country must be treated by or under the direct supervision of a veterinarian licensed to practice in Kentucky before being used for breeding.
	<b>Access Restrictions</b>	Agencies should consult legal counsel regarding open records matters.
	<b>Contents</b>	Series may contain: Name of lab; case number; date sampled; breed; sex; age; animal name/number; veterinarian name, address, city, phone number, signature; owner/farm name, address, city, phone number; animal's breeding history; clinical signs; anatomical area sampled; culture results; comments; laboratory personnel signature/initial, call, date reported.
	<b>Retention and Disposition</b>	Retain in agency five (5) years, then destroy.
03720	<b>Contagious Equine Metritis Imported Horse File</b>	This series documents the testing for and treatment of Contagious Equine Metritis (CEM). It also documents the worksheet kept on all mares and stallions under quarantine that have been imported into Kentucky from countries whose animals are known to be infected with CEM. Once a horse is imported into the state under quarantine, a licensed veterinarian must administer the CEM test and cultures.
	<b>Access Restrictions</b>	Agencies should consult legal counsel regarding open records matters.
	<b>Contents</b>	Series may contain: Notice from broker regarding importation of animal (name, sex, breed, destination, estimated date of arrival), contract signed by farm personnel that all testing and treatment requirements will be met, order of quarantine, copies of accession sheets documenting sites cultured and results, letter from attending veterinarian determining whether imported mare is in foal or barren, worksheet from testing veterinarian documenting that all testing and treatments have been completed and are negative, copy of quarantine release, USDA 127 forms.
	<b>Retention and Disposition</b>	Retain in Agency five (5) years, then destroy.
03721	<b>Equine Infectious Anemia Test Record</b>	This series reflects the testing for equine infectious anemia (EIA) required for all horses six (6) months old and older before being sold, raced, showed, and/or exported. This test is completed by a licensed veterinarian and sent to a state or federal laboratory for processing. Results are sent to the Division of Animal Health. If the test is negative, it is kept for one (1) year. If the test is positive, the results are transferred into the Equine Infectious Anemia Positive Case History Report (03722). This disease is very contagious and is often spread by biting insects in summer. All horses must be tested before entering Kentucky.
	<b>Access Restrictions</b>	KRS 61.878(1)(a) - personal information. Agencies should consult legal counsel regarding open records matters.
	<b>Contents</b>	Series may contain: Owner, Address, County, Date samples drawn, Total number of samples, Case number, Tube number, Name of horse, Age, Sex, Breed, Tag, Tattoo, Color markings, Lab results, Ref.
