Newspaper Source &
Alt-Press Watch

Nancy Houxeal
KDLA Division of
Library Services
Why Use Newspapers

- In-depth coverage of a particular country, state or city
- Reporting on activities of state and local government
- Eyewitness accounts of events
- Editorial analysis of news and events
- Up-to-date coverage of breaking news
- Obituaries and other information of interest to genealogists

Newspapers Valuable Research Tool

- Source of information about historical events
- Shows how people viewed an event when it happened
- Provides multiple points of view about an issue
- Permits researchers to trace the historical development of subjects over time
- Examines issues in the context of their time
- Gives snapshot of a time period detailing how people lived, and what they purchased
- Often contains commentaries or retrospective articles about events
Newspapers Reliable?

- May be biased
- May also be inaccurate or incomplete
- Must be questioned for its stake in the material.

Newspaper Databases

- Search more than one newspaper at the same time
- Powerful keyword search engines
- Access to content that costs money on the Web
- Find newspapers from a specific region or country

Protesting from Punishment: Public Education and the School Security Market

**Abstract**

The US educational and correctional systems are quintessential representations of the social welfare state and the penal state, respectively, and are typically configured as opposites. In the war-on-crime era, however, public schools collaborated with the criminal justice system to become more punitive. The restrictions began to show leadership and funding, and developed practices, technologies, cultural practices, and disciplinary rhetoric in common. In this article, the author explores the structural forces shaping the correctional approach in education. She draws on theories in the sociology of punishment to examine re-legalized youth punishment as a sociopolitical and economic strategy. This inquiry involves an assessment of the extent to which the sociopolitical economies of the penal state encroach the social welfare principles of public schooling. She also asks how the expansion of penalization in public schools addresses larger demands for economic growth and offers new strategies for managing populations alienated at the urban industrial cost.

**Full Text**

The US educational and correctional systems are quintessential representations of the social welfare state and the penal state, respectively, and are typically configured as opposites. In the war-on-crime era, however, public schools collaborated with the criminal justice system to become more punitive. The restrictions began to show leadership and funding, and developed practices, technologies, cultural practices, and disciplinary rhetoric in common. Critical attention to the punitive in public education has yielded new and situated analysis of the minority achievements gap (Lunes and Gilmore 2012). Penalized school failure has been institutionalized for increasingly severe school disciplinary climates, in which minority males have been disproportionately punished and consequently excluded from educational tasks (Lunes and Martone 2013). The racial disparities in school discipline are so extreme and the consequences so harsh, in fact, that recent scholarship in education presents the phenomenon as a major civil rights issue (idem).
