County Treasurer Records Retention Schedule

This retention schedule is to be used by all County Treasurer offices in the Commonwealth. It lists records that are legally required for them to create and/or specific to the County Treasurer Office. The County Treasurer Records Retention Schedule should be used along with the Local Government General Records Retention Schedule, which lists those records that are common to all local government agencies, i.e. financial, personnel, payroll etc. The records retention schedule is the foundation of an effective records management program and must be used on regular basis. All retention schedules have been approved by the State Archives and Records Commission in accordance with KRS 171.410 – 740. This approval provides the legal basis for all local agencies to apply the appropriate schedule to their records management needs.

GLOSSARY OF TERMS For Records Retention Schedules

- Permanent (P)** Denotes records appraised as having historical, informational or evidential value that warrants preserving them permanently (forever) beyond the time needed for their intended administrative, legal or fiscal functions. These records may be destroyed **only** after the written permission is given by the State Archivist and after they are microfilmed according to specifications published by the Department for Libraries and Archives.
- Confidential (C)** Records deemed unavailable for review by the public after applying the state’s Open Records Law (KRS 61.878) and other state and federal statutes and regulations with specific restrictions. The (C) is added to appropriate record series descriptions as a reminder to agency personnel and does not bear any legal status. **It is important to note that the local government head has the responsibility of knowing all the appropriate confidentiality laws, statutes and regulations that apply to the records maintained in their office and to see that they are enforced.** Even though a record series may or may not be marked confidential on a records retention schedule, contradictory laws or regulations that are approved after the retention schedule has been completed may not be reflected but must be honored.
- Vital Record (V)** Records that are essential to the continued functioning of the local government during and after an emergency, as well as those records that are essential to the protection of the rights and interests of that local government and of the individuals for whose rights and interests it has a responsibility. Local Government should have a plan in place to identify those records and provide for their protection in case of a disaster (fire, flood, earthquake, etc.).
- Duplicates** Duplicate records that have not been assigned a retention period and function solely as reference and informational material may be destroyed when no longer useful. If the duplicate is considered the “copy of record”, it must be retained according to the retention period on the schedule.
- Destruction Certificate** A destruction certificate should be used to document the destruction of public records and may be found, along with the instructions at the Kentucky Department for Libraries and Archives website (www.kdla.ky.gov). It should be used when destroying records according to the appropriate records retention schedule. No record created or maintained by a local government agency may be destroyed unless it is listed on the retention schedule and a destruction certificate completed and the original copy sent to the Department for Libraries and Archives (Department).
- After Audit** A term used in the disposition instructions to denote a records series that shall only be destroyed after the retention period has expired and an official audit has been performed. Example: 3 years and audit: This means that the record series must be kept for 3 years after last activity or date in a file. The record must have gone through the annual audit before it can be destroyed.
