Board of Landscape Architects

Records Retention Schedule

Prepared by the State Records Branch
Archives and Records Management Division
Approved by the State Libraries, Archives, and Records Commission
This records retention schedule governs retention and disposal of records created, used and maintained by the Board of Examiners and Registration of Landscape Architects (hereinafter Landscape Architects). Government records in Kentucky can only be disposed of with the approval of the State Archives and Records Commission (the Commission). If records do not appear on a Commission-approved records retention schedule, agencies should not destroy those records. This agency-specific schedule was drafted by Landscape Architects personnel and Archives and Records Management Division staff, and reviewed and approved by the Commission. This schedule provides the legal authority for the Landscape Architects to destroy the records listed, after the appropriate retention periods have passed.

Landscape Architects personnel should use this agency-specific schedule in combination with the General Schedule for State Agencies (General Schedule), also approved by the Commission. The General Schedule applies to records that are created, used and maintained by staff at all or most state agencies. Agency-specific retention schedules are used only by specific agencies and apply to records that are created only by a particular state agency, or to records that a state agency is required to retain longer than the approved time period on the General Schedule. The General Schedule and agency-specific retention schedule should cover all records for the Landscape Architects.

This retention schedule applies to state agency records and information regardless of how it is created or stored. For example, information created and sent using e-mail is as much a public record as materials created or maintained in paper. Kentucky law defines public records, in part, as “documentary materials, regardless of physical form or characteristics, which are prepared, owned, used, in the possession of or retained by a public agency” (KRS 171.410[1]). This means that records management standards and principles apply to all forms of recorded information, from creation to final disposition, regardless of the medium. Records retention scheduling is important in developing, using, and managing computer systems and other electronic devices. Records management practices encourage cost-effective use of electronic media through accurate retention scheduling and legal destruction of records.

All state government employees are responsible for maintaining records according to the retention schedule, whether those records are stored electronically or in paper. Information must be accessible to the appropriate parties until all legal, fiscal, and administrative retention periods are met, regardless of the records storage medium.

This retention schedule covers the content of records created by the Landscape Architects, including records created or stored using computers and computer systems. The General Schedule for Electronic and Related Records applies to records related to computers or a computer system. Examples of these include system documentation and use records, backup files, or website format and control records.

Audits and Legal Action
Agency records may be subject to fiscal, compliance or procedural audit. If an agency should maintain records longer than the approved retention period, as may be the case with some federal audits, then all affected records should be retained until the audit has been completed and the retention period met. In no case should records that are subject to audit be destroyed until the audit has been completed and retention periods met, or the records have been officially exempt from any audit requirements.

Records may also be involved in legal or investigative actions, such as lawsuits, administrative hearings or open records matters. These records must be retained at least until all legal or
investigative matters have concluded, regardless of retention period. This includes all appeals of lawsuits.

**Vital Records**
Vital records are essential to the continued functioning of an agency during and after an emergency. Vital records are also essential to the protection of the rights and interests of an agency and of the individuals for whose rights and interests it has a responsibility. Vital records are identified in the retention schedule with a (V).

**Confidential Records**
While all records created, used and maintained by government agency personnel are public records, not all of those records are open to public inspection. Whether a record is open to public inspection is determined by the state’s Open Records laws and other relevant state or federal statutes and regulations. Restriction of public inspection of confidential records may apply to the whole record or only to certain information contained in the record.

Kentucky’s public records are considered open for public inspection unless there is some specific law or regulation that exempts them. Agency personnel who believe certain records are confidential should submit a citation from Kentucky Revised Statutes, Administrative Regulations, Code of Federal Regulations, or similar authority. State agency heads have the responsibility to know all the appropriate confidentiality laws, statutes and regulations that apply to the records maintained by their agency and to see that those laws are enforced. Even though a record series may or may not be marked confidential on a retention schedule, contradictory laws or regulations that are passed after the schedule has been approved must be honored.

**Copies of Records**
Agency personnel often make copies of records for internal use or reference purposes. Agencies should designate one copy as the official copy and make sure it is retained according to the records retention schedule. Agencies can destroy all other copies when no longer useful.

**Updating the Retention Schedule**
Per 725 KAR 1:010, the head of each state government agency is required to designate a member of his or her staff to serves as a records officer. The agency records officer represent that agency in its records-related work with the Archives and Records Management Division. The agency records officer is responsible for assisting the Archives and Records Management Division in drafting a records retention schedule, and in finding any schedule updates to bring before the Commission. The retention schedule should be reviewed on a regular basis to suggest appropriate changes to the Commission.
The Board of Landscape Architects serves the Commonwealth to protect the public health, safety, and welfare through effective regulation of the practice of Landscape Architecture. The Board accomplishes this mission through examination and credentialing of prospective landscape architects, regulation and discipline of all licensed landscape architects, and through appropriate communication of information and laws pertaining to the practice of Landscape Architecture within the Commonwealth.

The title and practice of landscape architecture are governed by Kentucky Revised Statutes 323A and 201 Kentucky Administrative Regulations, Chapter 10.

Electronic System With Included Records Series

General Government Cabinet

Bd. of Examiners/Registration of Landscape Architects

System Description: The Board of Landscape Architects regulates the practice of Landscape Architecture through examination and credentialing of prospective landscape architects, regulation and discipline of all licensed landscape architects, and through appropriate communication of information and laws pertaining to the practice of Landscape Architecture within the Commonwealth.

This system allows licensed landscape architects, active and inactive, to renew their licenses online from May 1 to August 31 of each year. It requires applicants to assure the Board that they are not currently in arrears with the Kentucky Higher Education Assistance Authority and have completed continuing education requirements. Applicants must also provide current contact information and payment information for licensing fees. Applicants log into the system using their license number and last four digits of their social security number.

System Contents: Licensee contact information: name, address, phone number, email address.

Continuing education: proof of completed hours, course title, course outline, course instructor, and completion date.

Payment information: Bank account information for ACH (automated clearing house) payment (Bank Routing Number, Account number) or MasterCard / VISA information in order to pay the annual renewal fee plus a processing fee.

Contains ONLY license renewal information from Series 01364, Master Folders – Registered Landscape Architects.
