A MESSAGE FROM THE

SPRING 1988
VOLUME 1

A NEWSLETTER

FRIENDS OF KENTUCKY PUBLIC ARCHIVES, INC.

...
The new records center, now being constructed, will be the answer to the time-consuming process. The records are stored in a vault where the temperature and humidity are controlled to prevent further deterioration. The vault is designed to withstand fire and water damage. When the new county courthouse was completed in 1985, the records were moved to the new facility. The first step in the process was to weed out the records that were no longer needed. Then, the remaining records were restored using non-acidic paper and destroyed. The final step was to transfer the records to the new facility.

When the records were transferred, a team of experts worked to ensure that the information was not lost. The team consisted of historians, archivists, and preservationists who worked together to restore the records. The process was time-consuming and required careful attention to detail.

The new records center is equipped with state-of-the-art technology to ensure the longevity of the records. The center is equipped with fireproof and waterproof facilities to prevent damage from natural disasters. The center also has a backup system to prevent data loss.

The restored records are now housed in the new facility. The records are accessible to the public through an online database. The public can access the records through a user-friendly interface that allows them to search for information quickly and easily.

The new records center is a testament to the dedication of the county and its citizens. The center is a symbol of the county's commitment to preserving its rich history and providing access to the public.
ANNOUNCING

ALL KENTUCKIANS.

The Friends of Kentucky Public Archives, Inc. announce the extension of their membership drive for the year 1988, as a result of the current demand for membership. The membership drive is open to all, and members receive the following benefits:
