Why Use Newspapers

- In-depth coverage of a particular country, state or city
- Reporting on activities of state and local government
- Eyewitness accounts of events
- Editorial analysis of news and events
- Up-to-date coverage of breaking news
- Obituaries and other information of interest to genealogists

Newspapers Valuable Research Tool

- Source of information about historical events
- Shows how people viewed an event when it happened
- Provides multiple points of view about an issue
- Permits researchers to trace the historical development of subjects over time
- Examines issues in the context of their time
- Gives snapshot of a time period detailing how people lived, and what they purchased
- Often contains commentaries or retrospective articles about events

Newspapers Reliable?

- May be biased
- May also be inaccurate or incomplete
- Must be questioned for its stake in the material.

Newspaper Databases

- Search more than one newspaper at the same time
- Powerful keyword search engines
- Access to content that costs money on the Web
- Find newspapers from a specific region or country

Middle Search Plus
Designed for middle school libraries, this database contains full text for popular middle school magazines, full-text biographies and historical essays. In addition, it includes primary source documents, reference books and a vast image collection. Middle Search Plus contains primary source documents including Essential Documents in American History and reference books such as the Funk & Wagnalls New World Encyclopedia and the Encyclopedia of Animals. Full-text magazines include Sports Illustrated Kids, Scholastic News, National Geographic and dozens more. All full-text articles are assigned reading level indicators (Lexiles) that provide educators with an estimate of the results reading difficulty and the approximate grade-level reading ability required for comprehension. Lexiles help teachers meet the needs of students with varying reading abilities and interests and allow students to read along at their own pace.

Border Residents Remain Skeptical About The Need For An Expanded Wall.

AUDIE CORNISH: Some form of a **border wall** has existed for years in urban areas along the southern **border**. In some neighborhoods, the **wall** has helped reduce foot traffic and crime. Elsewhere, it's made a less tangible impact. And not everyone is convinced that the **wall** has made them safer. Monica Ortiz Uribe reports.

MONICA ORTIZ URIBE: At Ardovino's Desert Crossing, an Italian restaurant in southern New **Mexico**, it's not unusual for diners to look up from their gnocchi and see **Border** Patrol outside, aiming flashlights at the ground.

Abstract (summary)

The US educational and correctional systems are quintessential representations of the social welfare state and the penal state, respectively, and are typically configured as opposites. In the war on crime era, however, public schools collaborated with the criminal justice system to become more punitive. The institutions began to share leadership and funding, and developed policies, technologies, cultural practices, and a disciplinary rhetoric in common. In this article, the author explores the structural forces shaping the correctional approach in education. She draws on theories in the sociology of punishment to examine racialized youth punishment as a sociopolitical and economic strategy. This inquiry enables an assessment of the extent to which the sociopolitical economies of the penal state erode the social welfare principles of public schooling. She also ask how the expansion of penality in public schools addresses larger demands for economic growth and offers new strategies for managing populations abandoned at the urban industrial core.

The US educational and correctional systems are quintessential representations of the social welfare state and the penal state, respectively, and are typically configured as opposites. In the war on crime era, however, public schools collaborated with the criminal justice system to become more punitive. The institutions began to share leadership and funding, and developed policies, technologies, cultural practices, and a disciplinary rhetoric in common. Critical attention to the punitive in public education has yielded new and situated analyses* of the minority achievement gap (Losen and Gillespie 2012). Racialized school failure has been exacerbated by increasingly severe school disciplinary climates, in which minority males have been disproportionately punished and consequently excluded from educational tracks (Losen and Martinez 2013). The racial disparities in school discipline are so extreme and the consequences so harsh, in fact, that recent scholarship in education presents the phenomenon as a major civil rights issue (ibid.).
